ABOUT

I am deeply passionate about training AI models to enhance their writing capabilities. With two years of experience teaching Japanese and English and over three years as a Web Application Developer, I offer a unique combination of language expertise and technical skills. My hands-on experience in software development and ability to train generative AI models make me an ideal candidate for the Japanese Writer position.

WORK EXPERIENCE

Japanese and English Language Tutor (Part-Time)

April 2019 – March 2021

Seigakusha inc.

Nara, Japan

- Taught Japanese language, literature, and English language to junior high and high school students in a cram school setting.
- Developed and delivered lesson plans that improved students' reading comprehension, writing skills, grammar, and vocabulary in both Japanese and English.
- Conducted assessments, provided individualized feedback, and tracked student progress to ensure academic improvement.
- Collaborated with other tutors to enhance the learning environment and exchange effective teaching strategies.

Web Application Developer(Full-Time)

April 2021 - July 2024

Mitsui E&S Systems Research Inc.

Aichi, Japan

- Designed, developed, and tested web applications using AngularJS, C#, PostgreSQL, AWS.
- Collaborated with cross-functional teams to define project requirements, create wireframes, and develop user interfaces that meet client needs.
- Implemented back-end services, integrated APIs, and managed databases to ensure seamless application performance.
- Conducted unit testing, debugging, and performance optimization to deliver high-quality, scalable applications.
- Participated in code reviews and collaborated with team members to adhere to best practices and coding standards.
